

Figure 3-1. Measured PCB concentrations (in ppb) in Duwamish Waterway sediments.

3-4

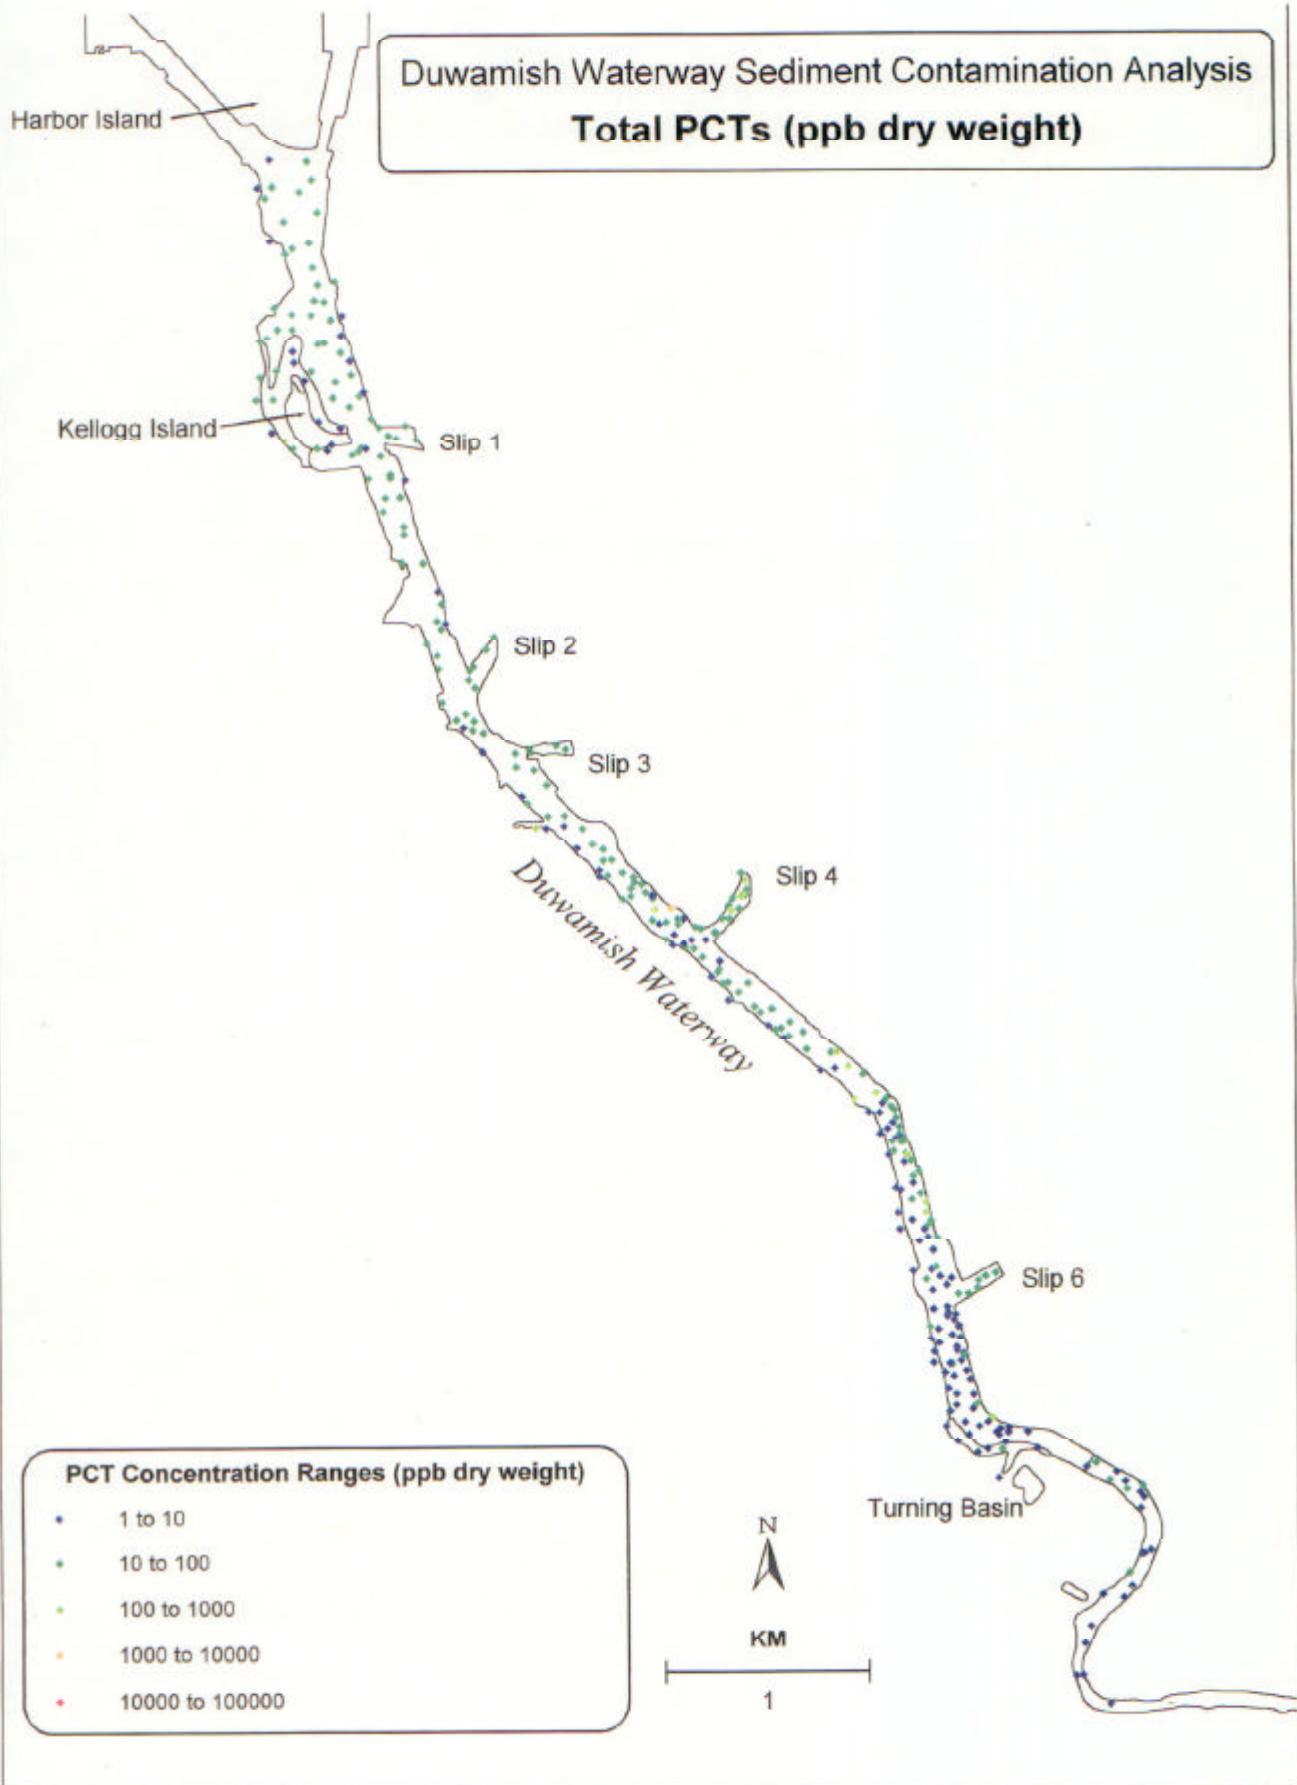

Figure 3-2. Measured PCT concentrations (in ppb) in Duquamish Waterway sediments.

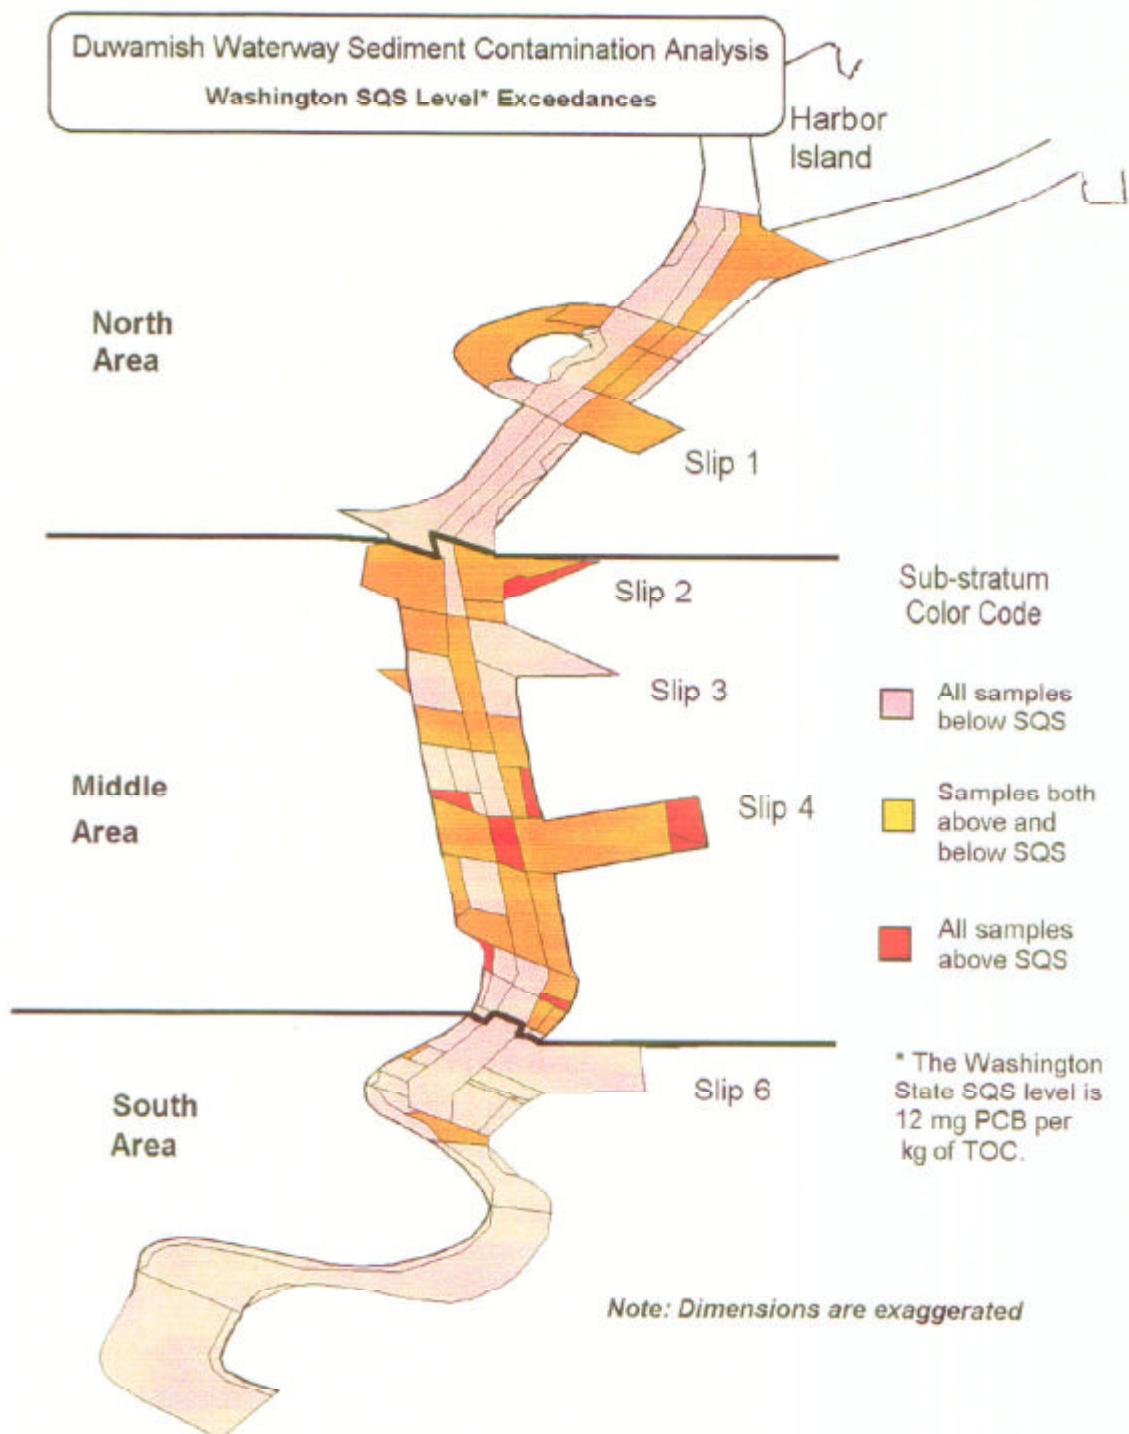

Figure 3-5. A schematic diagram showing three classes of sediment contamination relative to Washington State standards, based on samples collected within each sub-stratum.

Duwamish Waterway Sediment Contamination Analysis
Biocriteria Exceedances

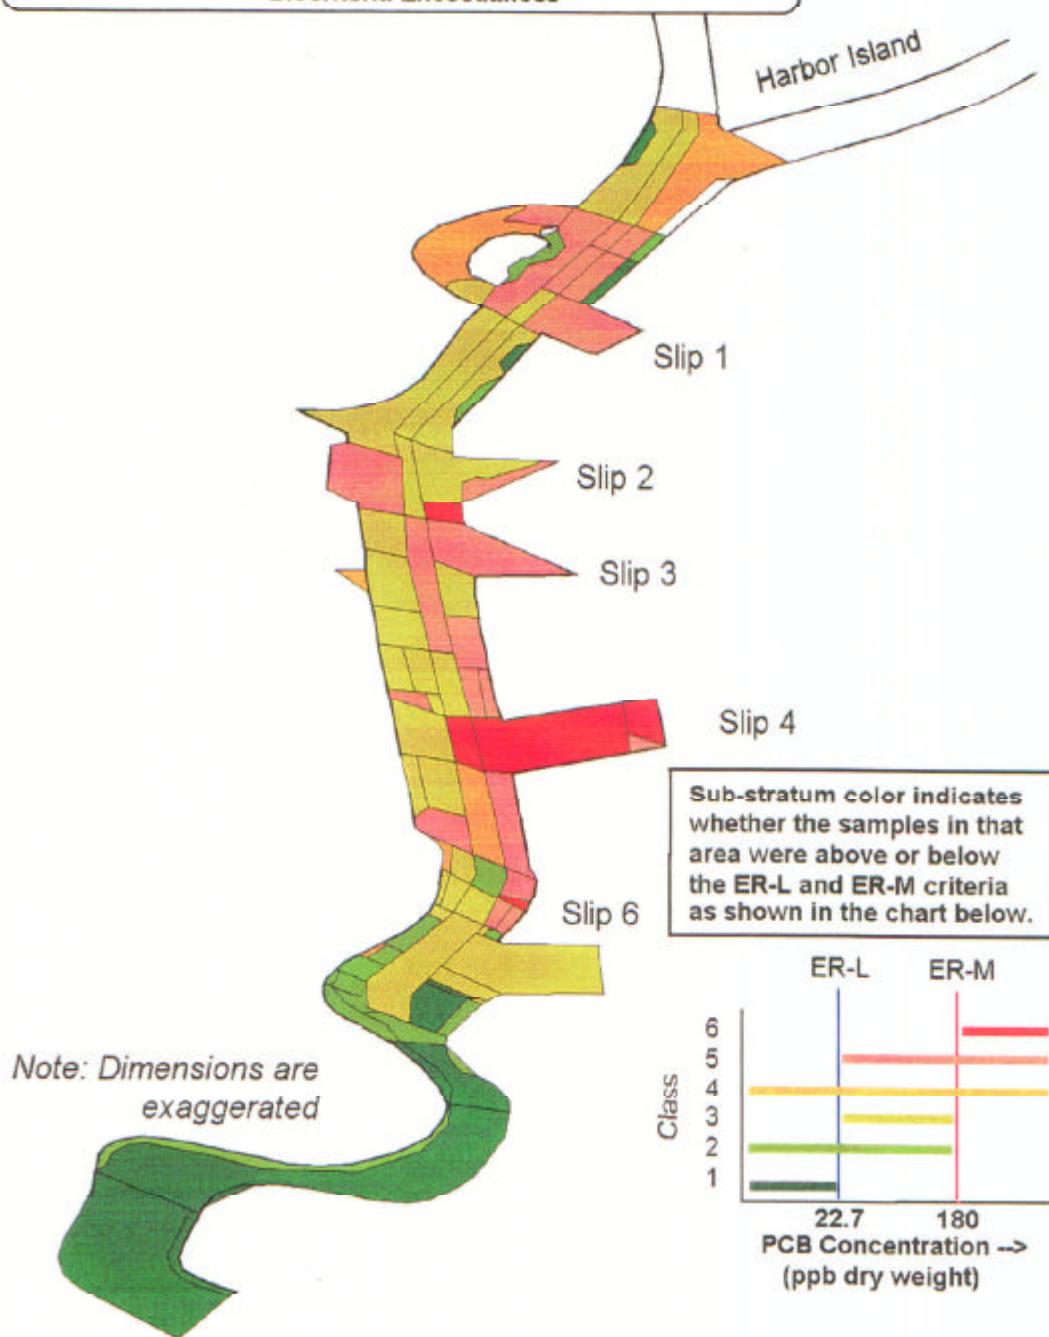

Figure 3-6. A schematic diagram showing six classes of sediment contamination relative to ER-L and ER-M levels, based on samples collected within each sub-stratum (see text for details).

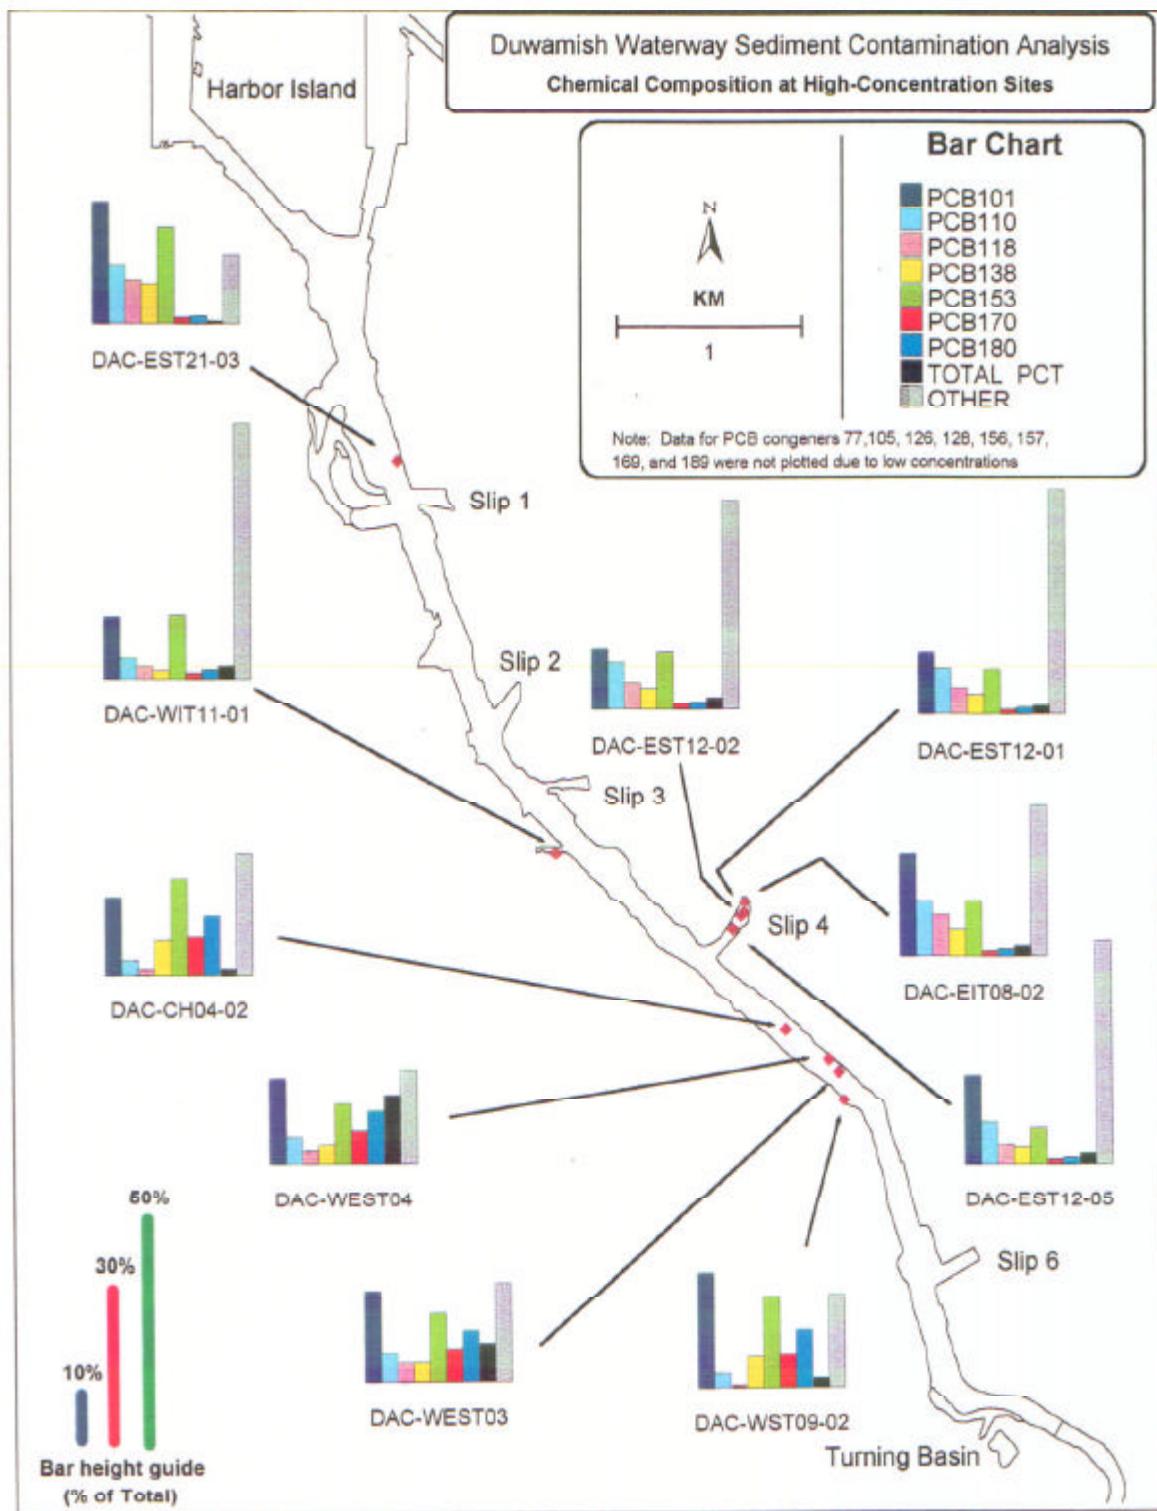

Figure 3-7. The chemical compositions of the 10 samples with the highest Total PCB + PCT concentrations; the samples' FIELD_IDs are shown below each graph.
